PROJECTS

Admin Portal and PassGenerator

- 1 Project Link: [User Portal](#)
- 2 [Admin Panel](#)

- Developed a comprehensive web application comprising a user-facing portal and an administrative dashboard. The system facilitates the generation and management of digital passes, streamlining access control processes

Key Features:

- **User Portal:** ○ Allows users to request and generate digital passes. ○ Provides real-time status updates on pass requests.
 - **Admin Panel:**
 - Enables administrators to review, approve, or reject pass requests.
 - Offers search and filter functionalities for efficient management.
- Technologies Used:** React, JavaScript, Node.js, Express, MongoDB

FitnessGym Exercise App

- **GitHub Repository:** <https://github.com/Aman-Kasaudhan/edtech>
- Developed a web-based fitness application aimed at providing users with a comprehensive platform to explore various exercises and workout routines.
- **User Authentication:** Implemented a login system to personalize user experience.
- **Exercise Catalog:** Designed a structured layout to display different exercises, potentially categorized by muscle groups or equipment.

EXTRACURRICULAR

¹Cybersecurity, UI/UX Designs, Competitive Programming

- Participated in college-level hackathons, gaining hands-on experience in rapid problem-solving and team collaboration.

²Volunteered as a mentor to peers, helping them Full Stack Development with React, HTML, CSS, JS, NODEJS, and DSA in Java, Python.

- Regularly engage in problem solving on platforms like LeetCode, codeforces, codechef, improve problem-solving skills.
- Developed strong communication skills through peer mentoring, presentations, and collaborative project work.

- Responsive Design: Ensured the application is accessible and user-friendly across various devices using HTML and CSS.
